

HIGHMARK 2015 PROVIDER NETWORK

A BROAD NETWORK OF HEALTH CARE PROVIDERS LOCALLY...

In 2015, our network gives you access to affordable, patient-centered care where you need it most—with doctors and hospitals that are in the community.

Highmark providers are committed to delivering care excellence for their patients. In fact, network physicians receive consistently high scores for care quality from NCQA, the National Committee for Quality Assurance.

In western Pennsylvania alone, the physician network includes more than 7,600 primary care physicians and specialists. Network specialists represent every kind of care specialty, including cancer, cardiology, behavioral health, dermatology, pediatric, physical/occupational therapies, gastroenterology, neurology, neurosurgery, obstetrics and gynecology.

More than 50 community and renowned tertiary and specialty hospitals and medical centers also make up the network. Allegheny Health Network hospitals and physicians will anchor Highmark's provider network. Many of these hospitals have been recognized by *U.S. News & World Report*, Thomson Reuters, Health Grades and other agencies for care innovations and superb clinical outcomes. Additionally, many have been designated Blue Distinction Centers® by the Blue Cross and Blue Shield Association.

In addition to this extensive provider network, Highmark will offer access to a health and wellness pavilion in Wexford, beginning in fall 2014. A new concept, this one-stop shop for most patient care needs offers convenient care services close to home and work.

You will have access to oncology services at the Hillman Cancer Center and all other UPMC-owned or managed cancer facilities and physicians. And you also have access to all UPMC facilities and physicians outside the five-county Pittsburgh region, including UPMC Altoona, UPMC Bedford, UPMC Hamot and its affiliate Kane Community Hospital, UPMC Horizon and UPMC Northwest.

...AND BEYOND!

As a Blue Cross and Blue Shield plan, Highmark gives members living or working outside western Pennsylvania network access to participating physicians, hospitals and other caregivers throughout the country.

For more than 75 years, Blue companies have been leaders in health care coverage, providing members with access to high-quality affordable care, assuring that no matter where they live or travel, responsive care is within reach.

Blue networks include more than 97 percent of all U.S. hospitals and more than 92 percent of all U.S. physicians—nearly 720,000 providers across the country!

In 2015, Highmark will connect you to a health care provider network that offers patient-focused care with state-of-the-art technologies. In western Pennsylvania, this network includes nearly 60 community and specialty hospitals and more than 7,600 physicians. With vast experience in cancer, heart, behavioral health, children's and women's care, your provider network can address any care need you may have. . .conveniently, compassionately and expertly.
